

Computer Society of India

CSI:

The CSI-MHSS chapter, active since the year 2004, is the training ground for achieving the brighter future of students by developing and enhancing their all-round development which essentially means, intellectual, moral, sensible and social development, as it realizes that there is a prime need of striking a balance between academics and co-curricular activities. CSI paves the way for students to become effective and responsible leaders by assigning various posts to students, thus encouraging and influencing a positive and healthy environment.
